

Workfront + Fusion Health Check

From Guesswork to Greatness — in Just 2 Weeks

Let's Find the Friction

Kick things off with a 90-minute diagnostic session

You show us how your team currently uses Workfront and Fusion — we listen, take notes, and start connecting the dots between what you have and what you need.

We Roll Up Our Sleeves

Our Adobe-certified consultants dig deep into your setup.

We audit, assess, and uncover hidden inefficiencies across every layer of your Workfront + Fusion instance — no fluff, just findings that move the needle.

What We Actually Look At

- **Process Plumbing** – Are your queues, templates, and flows optimized or just duct-taped?
- **People & Permissions** – Are users clear on roles and access, or is it chaos behind the curtain?
- **Data That Delivers** – Are dashboards and reports driving action or collecting dust?
- **Fusion in Motion** – Are your automations working for you or just... existing?
- **Scale-Ready Settings** – Can your current system grow with your business? .
